## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-12, drawn to a semiconductor device structure, classified in class
     257, subclass 565.
  - II. Claims 13-14, drawn to a process of making a semiconductor device, classified in class 438, subclass 205.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, in the process claim 14, instead of performing "diffusing" (line 20), the implanting can be performed, or instead of performing "implanting" (line 21), the diffusing can be performed.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2814
